2. Summary

For this Exchange Programme we had defined as an outcome the creation of a tool able to challenge the views of Media and Communication students on deaf people and media. For that, we have contacted different institutions both in Portugal and in the United Kingdom connected to deaf people and to public radio. As a result, we have produced a flyer called 'Radio for Deaf People: have you heard about it?' This is intended to promote discussion on the potential of digital and online technologies to facilitate a wider inclusion of the deaf community in relation to radio.
