

Kátai, Gábor (2006): Gondolatok az ifjúságpolitikáról és eszközeiről I. [Thoughts about Youth Policy and its Instruments] Belvedere Meridionale, Budapest 2006. (ISBN 963-9573-19-1)

This book is the ever first attempt in Hungary to synthesize the actually existing framework of youth policy, research, analysis and practical professional experience. On the one hand the book seeks for and tries to give answers to the main questions of youth work and youth policy, on the other hand it provides a comprehensive analysis of Hungarian youth work and youth policy from 1971 to 2005, especially concentrating on the processes of elaborating legal acts and youth related bills, the history and action of youth organizations as well as on the community based action for youth. A special chapter focuses on the challenges in Hungary: on virtual youth work, Human Rights education, youth work amongst Roma and integrated youth policies. This publication represents a valuable analytical approach towards supporting the implementation of state youth policy in the actual legislative period.

The publication exists only in Hungarian. An English translation is expected in the coming months.
