### CPI

The CPI Score relates to perceptions of the degree of corruption as seen by business people and country analysts, and ranges between 10 (highly clean) and 0 (highly corrupt). The results draw from polls of independent institutions. 158 (2005), 163 (2006) and 179 (2007) states were rated.

### BPI

The TI Bribe Payers Surveys evaluate the supply side of corruption - the propensity of firms from industrialised countries to bribe abroad. In 2006, the results draw from the responses of business people to the World Economic Forum's Executive Opinion Survey. A score of 10 indicates a perception of no corruption, while zero means corruption is seen as rampant. In 2006, 30 state were rated.
