COUNCIL OF EUROPE  
COMMITTEE OF MINISTERS  

RECOMMENDATION No. R (86) 18  

OF THE COMMITTEE OF MINISTERS TO MEMBER STATES  
ON THE EUROPEAN CHARTER ON SPORT FOR ALL: DISABLED PERSONS  

(Adopted by the Committee of Ministers on 4 December 1986  
at the 402nd meeting of the Ministers' Deputies)  

The Committee of Ministers, under the terms of Article 15.b of the Statute of the Council of Europe,  
Considering that the aim of the Council of Europe is to achieve a greater unity between its members,  
notably by means of common action in social and cultural matters;  
Considering that in the member states nearly one person in every ten suffers from a variety of  
impairment, disability or handicap;  
Bearing in mind its Resolution (76) 41 on the principles for a policy of sport for all and particularly  
Article I of the appendix thereto which states that “every individual shall have the right to participate  
in sport”;  
Having regard to Resolution No. 5 and Resolution No. 7 on sport for handicapped persons, adopted  
respectively at the 3rd (Palma de Majorca, 1981) and 4th (Malta, 1984) Conferences of European  
Ministers responsible for Sport;  
Bearing in mind its Resolution AP (84) 3 adopted in the framework of the Partial Agreement in  
the Social and Public Health Field, on a coherent policy for the integration of disabled people which states,  
in paragraph 2.4 of its appendix, that “participation in sport should be encouraged”, that “sport is a vital  
factor in rehabilitation and integration”, and that “sports activities should be intensified and their further  
development encouraged by appropriate public relations methods, the training of staff, the planning of  
sports centres and the promotion of associations”;  
Considering that it is necessary to create a welcoming climate for disabled people, to recognise their  
right to be helped and to improve their position in society;  
Considering that, in accordance with these ethical principles and the respect of each human being,  
the promotion and development of sport and physical recreation for all disabled persons is an important  
means of improving the quality of their life, as well as contributing to their rehabilitation and integration  
in society;  
Considering that the European ministers responsible for sport, meeting for their 5th Conference  
in Dublin (1986), adopted a resolution defining such principles under the title of the “European Charter  
on Sport for All: disabled persons”,  
I. Recommends the governments of member states:  
1. to take the action set out in Part A of the appendix to this recommendation;  
2. to encourage and work closely with the sports organisations concerned to take action set out in  
Part B of the appendix to this recommendation;
3. to distribute this recommendation widely amongst all sports organisations and other bodies and organisations concerned with disabled persons;

II. Instructs the Secretary General to transmit this recommendation to:

a. the governments of states party to the European Cultural Convention which are not members of the Council of Europe;

b. the competent international sports organisations, and other organisations concerned with the needs of disabled persons.

Appendix to Recommendation No. R (86) 18

European Charter on Sport for All: disabled persons

Part A

The governments of member states should:

1. take the necessary steps to ensure that all relevant public authorities and private organisations are aware of the sporting and recreational wants and needs, including in education, of all disabled persons—not only those who are physically or sensorially disabled and mentally handicapped, but also those who suffer from an organic or psychosomatic disorder;

2. orientate their policies for such persons so that they may have adequate opportunities to take part in recreational physical activities which will:
   - encourage their feeling of well-being and/or improve their physical condition;
   - provide self-fulfilling leisure-time occupations;
   - encourage social communication both between themselves and between them and able-bodied persons;

3. encourage the appropriate authorities to seek to ensure that public sports facilities are accessible to and usable by disabled persons and to incite these authorities:
   a. to consider the need to set aside public money to help with the conversion of existing facilities to meet the building guidelines set down in the appendix to the explanatory memorandum to this recommendation or equivalent national standards;
   b. to ensure so far as is possible that future sports facilities will meet these guidelines or equivalent national standards;
   c. to take steps to familiarise architects and managers of sports facilities with the requirements of disabled people;

4. encourage co-operation between the various public authorities involved in sport for disabled persons, such as health, social welfare, education and sport departments, and their policies and actions;

5. encourage where appropriate the setting up of an umbrella body for the development of sport for all disabled persons, bringing together all appropriate and relevant interests and expertise;

6. encourage those financing sports activities for all disabled persons to take account of their special needs and requirements;

7. encourage the development of sport and recreation for disabled persons as an integral part of rehabilitation and as a continuation of it as well as for its wider general benefit;

8. encourage research, as necessary, which will determine scientifically the physiological, psychological, social or other benefits of sport for different categories of disabled people, together with other research which may be deemed to be appropriate;

9. encourage educational authorities to take sufficient steps to provide adequate and real physical education for disabled children in schools, and to train to the required level those who may teach these children;

10. encourage the provision of opportunities for disabled persons who so desire to train as physical education teachers;
11. encourage the provision of training of disabled and able-bodied instructors to work with recognised competent sports organisations;
12. ensure that when sports policy is being decided the interests and views of disabled persons are given due consider-
ation;
13. ensure, within their constitutional limits, that this recommendation is also observed by the appropriate regional and local authorities with competence in any of the areas mentioned above.

Part B

The governments of member states should encourage and work closely with the sports organisations concerned in order:
1. to develop appropriate activities at all levels of sport for disabled persons and to ensure in particular that recreational participation in sport is adequately provided for;
2. to consider ways in which disabled persons may be offered opportunities for integrating into traditional sports clubs and organisations;
3. to encourage disabled persons to contribute directly to the development of sports policies which concern them;
4. to ensure that in their policy-making and decisions the sporting interests of all disabled persons are taken into due account;
5. to recognise that disabled persons may aspire to elite sport and to participate in it according to their abilities and to ensure that the organisation of such competitions does not in any way lead to the exploitation, whether physical, psychological or financial, of possible participants;
6. to continue the efforts, at national, regional, and local levels, and within the competent international sports organisations to harmonise, simplify and, where appropriate, to reduce the classification categories and the eligibility criteria for participation at competitions between disabled persons;
7. to intensify efforts to enable disabled persons, insofar as they may desire to do so, to compete in the same events as the able-bodied, while preserving the principle of fair and equal competition;
8. to intensify the co-operation of their activities, with a view to eventual unification, both at international level and at national level, in the body described at Article 5 of Part A;
9. to develop policies designed to give the general public more information on sport for disabled people.
